Supporting you during the COVID-19 crisis

FREE COLLABORATION WITH TRICEFY™ INSIDE YOUR VOLUSON™ AND VIEWPOINT™

In this unprecedented emergency situation, caring for your patients is even more challenging. Providing healthcare services related to pregnancy is vital and cannot be postponed. Mitigating the risk of exposure and ensuring the safety and wellbeing of both mother and fetus is imperative. We want to help providing a safer environment for you and your patients by offering Tricefy's collaboration platform free of charge during this COVID-19 crisis. Tricefy is an integrated, cloud-based solution that allows you to share examination images, clips and reports with colleagues and seamlessly collaborate with them. Activation is simple and supported remotely.

REMOTE ACCESS

Healthcare workers are one of the groups most at risk of catching the virus. If you are challenged with medical staff shortages as your colleagues are infected or quarantined, they still can help by reviewing the ultrasound examinations from home.

Tricefy supports remote reviewing from **anywhere at anytime** immediately after you uploaded the exam from your Voluson or ViewPoint.

Ensuring the best possible care for every patient in this time of crisis.

REMOTE CONSULTATION

You have a concern on your patient's ultrasound, and need a second opinion. You want to refer the patient to a colleague but do not want to risk the potential for exposure. Only a second opinion would provide clinical confidence for you and your patient.

With Tricefy you can **easily and securely** share images and reports with colleagues to review and advise if referral is required.

Enabling the continuum of care while keeping patient and medical staff safe.

REMOTE COLLABORATION

The ultrasound exam of your patient is confirming a condition that requires special care. You need to work with one or several specialists to evaluate and decide what the best care plan for your patient is. Potential exposure for your patient as well as you and your colleagues needs to be minimized as much as possible.

Tricefy allows you to share examination results with colleagues and **seamlessly** collaborate with them.

Expanding collaboration and still managing risk.

Tricefy* is an integrated cloud-based solution that allows you to easily share images and reports with colleagues as well as to securely archive them.

*Tricefy is not available in all countries. Please contact your Sales Representative for more information.

To support healthcare providers globally during the COVID-19 crisis, Trice Imaging is offering the following COVID-19 package free of charge for at least 90 days.**

- Remote access to all clinical tools
- Remote consultation and collaboration features with full audit trail
- Secure, compliant storage of imaging studies for 12 months
- Automated routing of imaging studies between facilities
- 100% remote installation and support included

Tricefy is already embedded in your Voluson and ViewPoint* – you only need to register and activate it!**

**Patient sharing, long-term archiving can be purchased separately. Applicable for new customers only. For existing customers, connection to referral partners will be free of charge.

*** Tricefy is integrated in Voluson as of BT17 on Voluson Expert Series and BT16 Ext.6 on Voluson Signature and Performance Series but also older systems can be connected to Tricefy. The only prerequisites is a DICOM enabled ultrasound system and an internet connection. Tricefy is integrated in ViewPoint 6 as of version 6.5.2. For more information on connecting systems please contact support@triceimaging.com.
