

Logging into Manage Using Two-Factor Authentication

Last Modified on 10/01/2021 8:50 am EDT

*** Please note**** <https://new-manage.tricify.com> will NO LONGER WORK. The new address will be <https://tricify4.com/manage/>

To ensure the safety of your Manage account, Trice Imaging requires a password and two-factor authentication to login. Two-factor authentication, or 2FA, adds another layer of security protection for your account. First you will enter your password, followed by a unique numerical code that will be generated by an authentication app that is tied to your Manage account. Please do not delete the app as you will need a numerical code each time you login. One example of an easy to use authentication app is **Authy**, but there are many to choose from.

Please see the following pdf instructions on how to add 2FA to your Manage account.
