## Trice and athenahealth

### Improving the way clinicians share with patients, collaborate with colleagues, and manage their image data

The seamless integration between Trice and athenaClinicals, has streamlined how users access their imaging data. Here's a short video to show you how it works:

1. Users place an order for an imaging study in athenaNet.
2. Next the study is performed and all pertinent DICOM data is sent to Trice.
3. Once completed, a link to the images will be available in the patient chart under "Imaging Results".
4. Clicking on the link labelled "trice images" will open the study into the Trice viewer.
5. All Trice viewer functions are available: sharing, collaboration, reporting
