

Printer Shortage Social Media

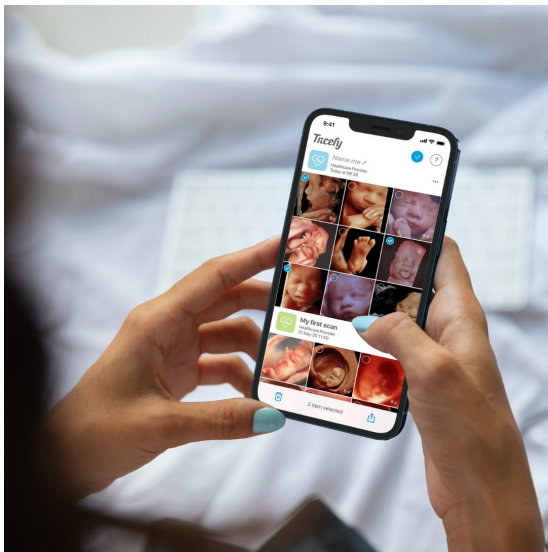

Last Modified on 04/25/2022 10:19 am EDT

Example 1:

No printer? No problem.

Receiving ultrasound images digitally is something millennial mothers today expect from their providers. With the Tricefy Patient App, patients can receive their ultrasound images and clips directly on their phones within a heartbeat!

Example 2:

Did you know that the average age of first-time moms is 27?

That would mean the new mothers today were born around 1995. Printing thermal paper is not only cumbersome and expensive. It's outdated.

Patient Sharing services can be a competitive advantage. Let's make the choice of provider an easy one.
