Check out our new Tricefy user, VC de Poort in Holland

VC de Poort are using Tricefy to send ultrasound images to their patients, replacing old methods of giving out USBs, printing thermal paper or burning CDs. Clients at VC de Poort can now receive clips and images digitally through the Tricefy Patient App 📱

<https://youtu.be/rWqij6wACRQ>

"Tricefy is a very pleasant method to send the images instantly, it gives less stress and it does not delay the appointment. They can send it to their grandparents, or if their partner could not be present at the appointment."
