Top 5 Reasons to Use Tricefy Clinical Reporting Tools

Adaptive Reporting can improve productivity by reducing manual errors, time and cost, making your work and life better! Here are our top 5 reasons why you should be using Tricefy Clinical Reporting Tools:

1. Accessibility

Easily share reports with patients and collaborate with colleagues - in a safe and compliant manner. Tricefy reports are stored alongside the patient examination with access anytime, anywhere on any device.

2. Streamline Your Clinical Workflow

Reduce time and error on repetitive data entry and make more time for high-value tasks. Increase patient satisfaction by spending more time with patients or free up time for additional patients.

3. Data Backup

Tricefy reports are safely stored alongside the patient examination within the Tricefy Cloud offering a secure, long-term, disaster-proof, easily searchable database for your medical images and data.

4. EMR Integration

Tricefy can integrate with your EMR, creating one centralized location for all of your patient information, reports, and imaging.

5. Better for the Environment

Digital reporting makes the need for printing and faxing obsolete. Being green can also help you keep more green by reducing paper, printing, and ink costs.
