

Trice and EchoNous 1-pager for POCUS

Last Modified on 01/10/2025 5:21 am EST

EchoNous and Trice have teamed up to deliver a seamless end-to-end clinical workflow solution that harmonizes point-of-care ultrasound and clinical image management. This 1-pager is available to educate customers about the EchoNous and Trice partnership.

EchoNous and Trice have partnered to deliver a seamless, end-to-end clinical workflow solution that harmonizes point-of-care ultrasound and clinical image management.

EchoNous is pioneering a new POCUS era with **Kosmos**—a fusion of cart-based system quality, handheld affordability, and AI enhanced efficiency. When integrated with Trice’s cloud-based PACS, **Tricefy**—enabling long-term storage, secure image routing, clinical collaboration, and remote access—this solution streamlines the entire clinical workflow, from imaging intake to diagnosis. Together, EchoNous and Trice create a platform that empowers providers across the care network to deliver superior care with unmatched convenience and efficiency.
